

INNOVATION LIKE YOU'VE
NEVER
SEEN

PORTAVISION™ **CAMERA**

Born ahead of its time. The smartest technology. Unrivaled versatility. Cut-through clarity.

HammerHead® puts the power of it all right at your fingertips. The new PortaVision pipe-inspection camera begins a new era of technology, with a retina-display iPad® 4 as its screen, giving you amazing flexibility on and off the job site, with exciting possibilities for promoting your company. Plus, we've kept all the features you already love, like instant snapshots, on-screen drawing and a full on-screen keyboard. Even more, the PortaVision comes with a self-leveling color camera, locating beacon, 200' of high-efficiency, super-slick push rod. All this packaged into a unit light enough to carry anywhere, though we still include our built-in transport cart.

PORTAVISION™ CAMERA

The PortaVision only weighs 34 pounds, but we included a transport cart as standard, in case you'd rather wheel it around than carry it.

The iPad easily removes from the PortaVision unit, communicating with the unit via a Wi-Fi router, allowing the operator to roam freely away from the unit base.

The optional 50' black and white mini-camera is an ultra-flexible camera that allows quick peeks into small drain lines — often without removing the trap — and easily connects to the PortaVision camera system, which automatically senses when the camera has been attached.

SPECIFICATIONS

- Pipe sizes: 2" – 6" diameter
